**MARITIME DIRECTIONS TO MARKET I-SEAPORTS™ MANAGEMENT FROM HARBOUR MASTERY
ERP, ACCOUNTING & CRM ECOMMERCE SOLUTION FOR PORT MANAGEMENT**

Charles A. Towsley PPM, President and CEO of Maritime Directions Management Corp. of Miami announced today that his company will market i-Seaports™ Management with Harbour Mastery®, Inc., a Tampa based firm.

"I am excited about the pioneering innovative approach of Harbour Mastery" said Towsley, "and its integration of traffic, security, communication, financial control and marketing in one solution. The fact that they have chosen an internet-based approach positions this product well for the future. Their comprehensive ERP & CRM approach emphasizes the commercial need of ports while meeting new security needs and requirements."

i-Seaports™ Management is a new product in the maritime marketplace built on the powerful NetSuite® ERP/Accounting, CRM and Ecommerce platform. This Software-as-a-Service (SaaS) Architecture allows the integration of traffic management, security monitoring, and communications coordination with full accounting, and marketing and sales for growing the port enterprise.

i-Seaports™ provides for internal linkages to web-cams, AIS tracking, and web-services like the Lloyd's Register-Fairplay Sea-Web® Ships Register to streamline security monitoring and insure accuracy of information. I-Seaports™ telephony is a full service call center for coordinating vessel traffic. Customizable dashboards give customers 24/7 access to make reservations, see and pay their accounts and monitor their vessel call processes. Banking reconciliation and overnight currency rates updates further streamlines commerce. Putting all customers, security agencies, first responders, and vendors online further streamlines the traffic, security and communications processes. In an emergency, complete remote operation is a plus

"Maritime Directions and Mr. Towsley's years of experience and expertise in Port management and how they market themselves is a great addition to Harbour Mastery's consulting services delivery for ports of all sizes" says M. George Walters, President of Harbour Mastery. "Seaports that are seeking new ways for marketing and growing their enterprise will love the global nature of i-Seaports" adds Towsley. "This is a practical avenue to secure international trade relations that I believe has a bright future."
